Dynamics NAV Report Upgrade

Xperit Solutions Case Study: Dynamics NAV Reports Upgrade

ABOUT XPERIT SOLUTIONS

Xperit Solutions from The Netherlands is a Dynamics NAV partner which has an Add-On (Xsuite) that is mainly focused on Retail- and Production Businesses in The Netherlands. Besides customers using this Add-On, company also has customers in other branches of Business like fashion, surgery equipment and government.

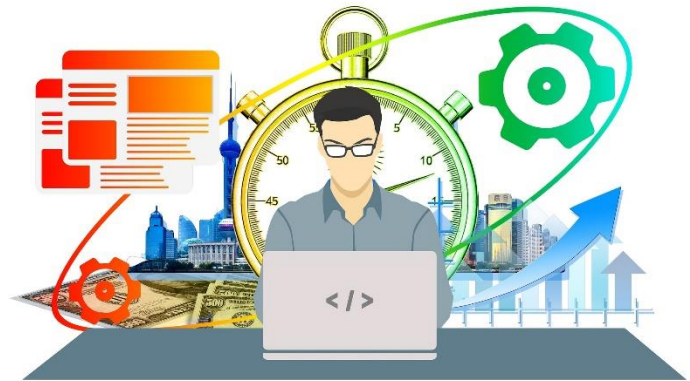

At the moment Xperit Solutions has over 80 customers and growing fast with one new NAV implementation every month on average. There are about 15 people working at Xperit Solutions, but they are still growing and looking for new employees now.

Dynamics NAV Report Upgrade

CHALLENGE: Many Reports Needed To Be Upgraded In a Very Short Amount of Time

The problem Xperit Solutions faced is similar to other NAV partners that do upgrades to customers: too many reports needed to be upgraded in a very short amount of time. Company simply didn't have the resources available to get it done fast enough.

SOLUTION: Reports Upgrade on Time using Simplanova Report Upgrade Service

At first Xperit Solutions were looking for a reporting tool to automatically upgrade reports from Classic to RDLC by themselves. They tried to build own tool, but this was not their core business and took too much time to develop. Xperit Solutions found that Simplanova has it's own Dynamics NAV report builder, but finally decided to start with Simplanova service to Upgrade Reports instead.

During Dynamics NAV reports upgrade project:

- Best practices and experience of Simplanova developers was used to ensure the reports follow the highest quality standards;
- Automated NAV report upgrade tool was used to make reports' upgrades faster and meet a project time limit;

- Data masking tool was used to have correct data and to avoid conflicts related to confidential client business information;
 - Simplanova dedicated team communicated directly and provided quick responses to questions and quotes.
-

The main advantages of work with Simplanova are the direct communication, high quality of work and quick responses to questions and quotes.

MICHAEL GLASHOUWER, Manager Development, Xperit Solutions

RESULTS: Direct Communication and High Quality of Work Led to Successful Delivery of the NAV Report Upgrade Project on Time

The partnership with Simplanova gave Xperit Solutions possibility to successfully deliver the Dynamics NAV report upgrade project on time.

30 Xperit Solutions customer reports were upgraded from Dynamics NAV version 4.00 SP3 NL to 9.00 NL in time and fully tested afterwards. The project took 57 hours total. Automated tools were used to ensure that upgraded reports perform well and the reports were upgraded in shortest time possible.

Simplanova's progress update reports were sent regularly to keep Xperit Solutions informed about the project's milestones. Since it was critical to meet the deadlines of their customer report upgrade project, Simplanova's project managers had to be prepared to react as soon as possible.

Dynamics NAV Report Upgrade

To ensure the reasonable period of time to finish all acceptance tests by Xperit Solutions, 1 month support period for the project was offered.

Would Michael Glashouwer recommend using Simplanova services? “Definitely!”.

About Simplanova

Simplanova is a software development company working solely with Microsoft Dynamics Partners. Helping Partners by giving the ability to acquire the skills needed, cut overtime costs and increase the efficiency of services.

The efficiency is achieved by specializing in Dynamics NAV, using our automated processes of development and standardized techniques. The main focus is on Dynamics NAV Upgrades - our Partners have experienced significant upgrade project time reduction given by our automated tools.

Simplanova cooperates with its Partners (ISV and VAR), letting them focus on their primary objectives, allowing to achieve their strategic goals through greater efficiency.

Our services: Microsoft Dynamics NAV Upgrade (all versions), Microsoft Dynamics NAV Development, RDLC Reporting Training service, Microsoft Dynamics NAV RTC Add-in Development, Microsoft Dynamics NAV Integration, Microsoft Dynamics NAV Localization.

We also offer **Simplanova Report Designer** – Dynamics NAV report building tool. With Simplanova Report Designer You will no longer need specialist skills to design reports. Instead, you are able to develop customized RDLC reports quickly and easily with a process that is as simple and intuitive as the original Classic approach.
