## Simplanova Report Converter

**CHALLENGE:** For current NAV project to convert reports from Classic to RDLC automatically

For a current Dynamics NAV Upgrade project, Konica Minolta IT Solutions was looking for a solution to convert classic reports from Dynamics NAV 2009 to RDLC reports for Dynamics NAV 2017. The main requirement for the solution was, that the tool must build standard RDLC reports with no other costs for the customer.

**SOLUTION:** Simplanova Report Converter. The tool, which automatically converts classic NAV reports to RDLC

For converting 40 customer reports during Dynamics NAV upgrade project, Konica Minolta IT Solutions used Simplanova Report Converter, which converted classic NAV reports to RDLC.

*The main advantage of Simplanova Report Converter is that the tool converts the classic reports to RDLC. There are no costs to customer for using the reports and converted reports can be edited by using standard editing tools. Simplanova Report Converter saved us **90 – 95 % of time** in comparison with building manual RDLC reports.*

*I. A. JÖRG RENZ, Senior Developer, Konica Minolta IT Solutions GmbH*
