

Business Applications Partner Alert

September 2025

Date Change for Dynamics 365 Business Central Pricing Update

On May 6, we [announced](#) an update to our commercial pricing for Microsoft Dynamics 365 Business Central, the first update in more than five years.

To allow partners additional time to communicate prices to customers in local currencies, we are pushing back the price adjustment to Dynamics 365 Business Central from October 1, 2025 to November 1, 2025.

Below you will find the list of online products for which prices are being updated, as well as the increased storage allocation, with effect from November 1, 2025:

Product	Price and storage before November 1, 2025	Price and storage as of November 1, 2025
Dynamics 365 Business Central Essentials	\$70/month with 2GB storage	\$80/month with 3GB storage
Dynamics 365 Business Central Premium	\$100/month with 3GB storage	\$110/month with 5GB storage
Dynamics 365 Business Central Device	\$40/month with 1GB storage	\$45/month with 1.5GB storage

The updated prices apply to new subscriptions and to existing subscriptions upon their first renewal on or after November 1, 2025. Dynamics 365 Business Central remains available for purchase at its current price until November 1, 2025. As previously communicated to Dynamics resellers, related pricing changes to Business Central on-premises (via DPL/SPA program) will still be effective October 1, 2025.

We remain deeply committed to our customers, and we're confident that our updated pricing will offer more resources to build on these capabilities and allow us to maintain our position as a leader in delivering an end-to-end business management solution to small and medium businesses.
